## SUMMARY

---

Full-stack engineer with 5+ years building and scaling production web and mobile applications across React, Next.js, React Native, and Node.js with MongoDB, MySQL, RabbitMQ and Redis. Founding-engineer experience owning features end to end, integrating payments, and shipping real-time systems.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, ReScript, Java (Core), SQL

**Frontend:** React, React Native, Next.js, Redux, React Query, Expo, HTML5, CSS3, Tailwind CSS, Bootstrap

**Backend:** Node.js, Express.js, REST APIs, Microservices, RabbitMQ

**Real-time:** WebSockets, Server-Sent Events (SSE), Long Polling

**Databases & Cloud:** MongoDB, MySQL, Redis, Firebase, AWS (EC2, S3, ELB, Amplify)

**Practices & Tools:** Git, CI/CD, Code Review, Agile, Postman, VS Code, Android Studio, Xcode

## EXPERIENCE

---

### Software Development Engineer II

May 2025 – Dec 2025

*Porter (Contract)*

*Bengaluru, India*

- Owned a rewards-based utilization module in React (ReScript) end to end, lifting order fulfillment by 8%.
- Architected a JSON-driven configuration platform enabling non-engineering teams to manage product configurations independently, removing a recurring engineering dependency.
- Drove features from design through release, partnering with product and backend teams to define API contracts.

### Founding Software Development Engineer

Mar 2023 – Feb 2025

*Unsweetened Beauty*

*Hyderabad, India (Remote)*

- First engineering hire; built the company's cross-platform mobile app from scratch (React Native, Redux), which won Google Play's Hidden Gem award in 2023.
- Developed multiple production web applications from the ground up with React, Node.js, and MySQL, focused on performance and scalability.
- Integrated secure payment gateways across web and mobile, enabling seamless end-to-end transaction processing.
- Set early engineering standards and partnered with co-founders, designers, and product managers to define scope.

### Software Development Engineer

Aug 2022 – Mar 2023

*LogiPe Fintech Pvt. Ltd*

*Bengaluru, India*

- Developed and maintained web (React) and cross-platform iOS/Android (React Native) apps powering core fintech features, using Redux for predictable state management across complex, multi-step transaction flows.
- Built key modules and integrated payment gateways, third-party libraries, and REST APIs for primary user flows.

### Software Development Engineer

Apr 2021 – Aug 2022

*LetsEndorse Development*

*Bengaluru, India*

- Prototyped and shipped microservices-based web and mobile applications in close partnership with UX designers.
- Independently delivered multiple production applications using React, React Native, Node.js, and MongoDB.
- Developed and integrated new features and patches into existing production applications across release cycles.

### Frontend Developer Intern

Dec 2020 – Mar 2021

*OwnersTown*

*Bengaluru, India*

- Built responsive websites with React and Bootstrap, and reusable mobile components with React Native and Expo.

## PROJECTS

---

### THaF

2026 – Present

Group riding app offering navigation, real-time group tracking, invite-only rides, SOS alerts, instant messaging, expense management, and high-resolution media sharing.

-React, React Native, Express.js, Node.js, MongoDB, Redis, RabbitMQ, WebSockets, SSE, Long Polling, AWS (EC2, S3)

### Within

2023 – Present

Product built for offering guided meditation, journaling, focus challenges, and study rooms.

-Next.js, React Native, Redux, Express.js, Node.js, MongoDB, AWS, Razorpay
